- Courses available in all living languages
- Tailor-made classes and seminars designed to meet every need

More than 135 years experience. More than 550 locations in over 70 countries. More than 300,000 satisfied customers around the globe every year. Numbers that speak for themselves, making Berlitz one of the leading providers worldwide for language training, intercultural training and business seminars.

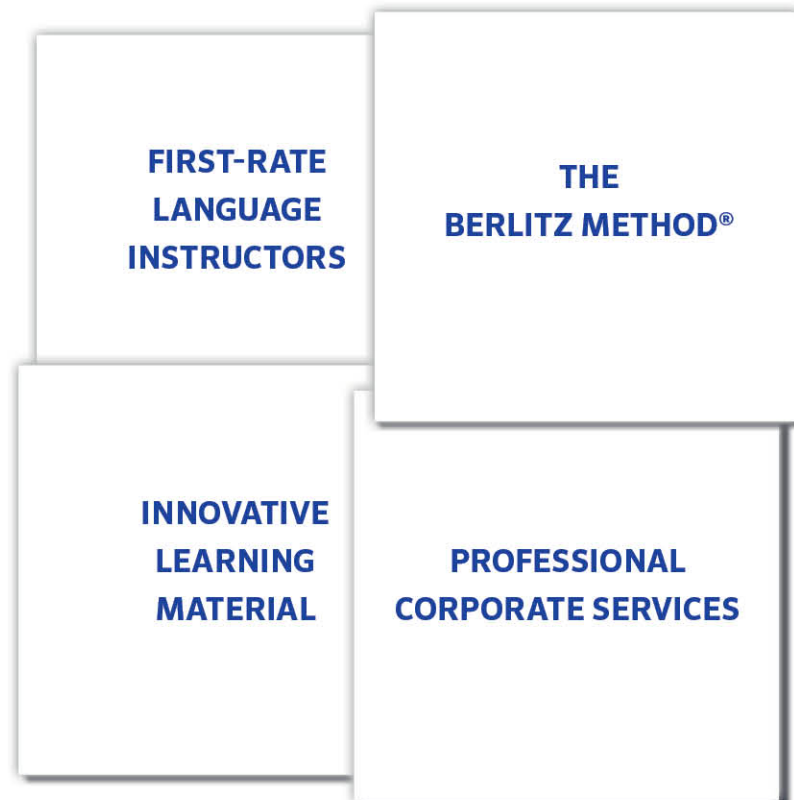

That said, we always see the individual as pivotal. The individual's own progress in a language, his newly gained or increased understanding of other cultures, and of course the joy he feels while learning and using what he has learned.

So there are many things that make Berlitz your ideal partner in the field of training. One of the most important being: speaking itself! Based on the proven and continually developed **Berlitz Method®**, active speaking takes center stage – and ensures fast learning success in the chosen language in every one of our individual and group courses, all of which are **customized to the specific requirements** of the respective company.

While achieving agreed goals within a specific time frame, our corporate clients enjoy working together with Berlitz for many reasons in addition to the Berlitz Method®.

As well as our **professional Corporate Services**, all courses are taught by **first-rate language instructors** and include **innovative and trend-setting course materials** – with a clear orientation around the needs of companies and participants.

“The people at Berlitz speak many different languages. And one common one: the language of success.,”

BERLITZ LEARNING CYCLE

Language learning at Berlitz - this stands for competent attention and support for all course participants. From the first contact with a language through to its perfect mastery.

The clear and exact documentation of the return on investment of training - That is the objective of Berlitz's Training Evaluation System. Within this process the regular assessment of the learning progress gives an overview of every participant's performance.

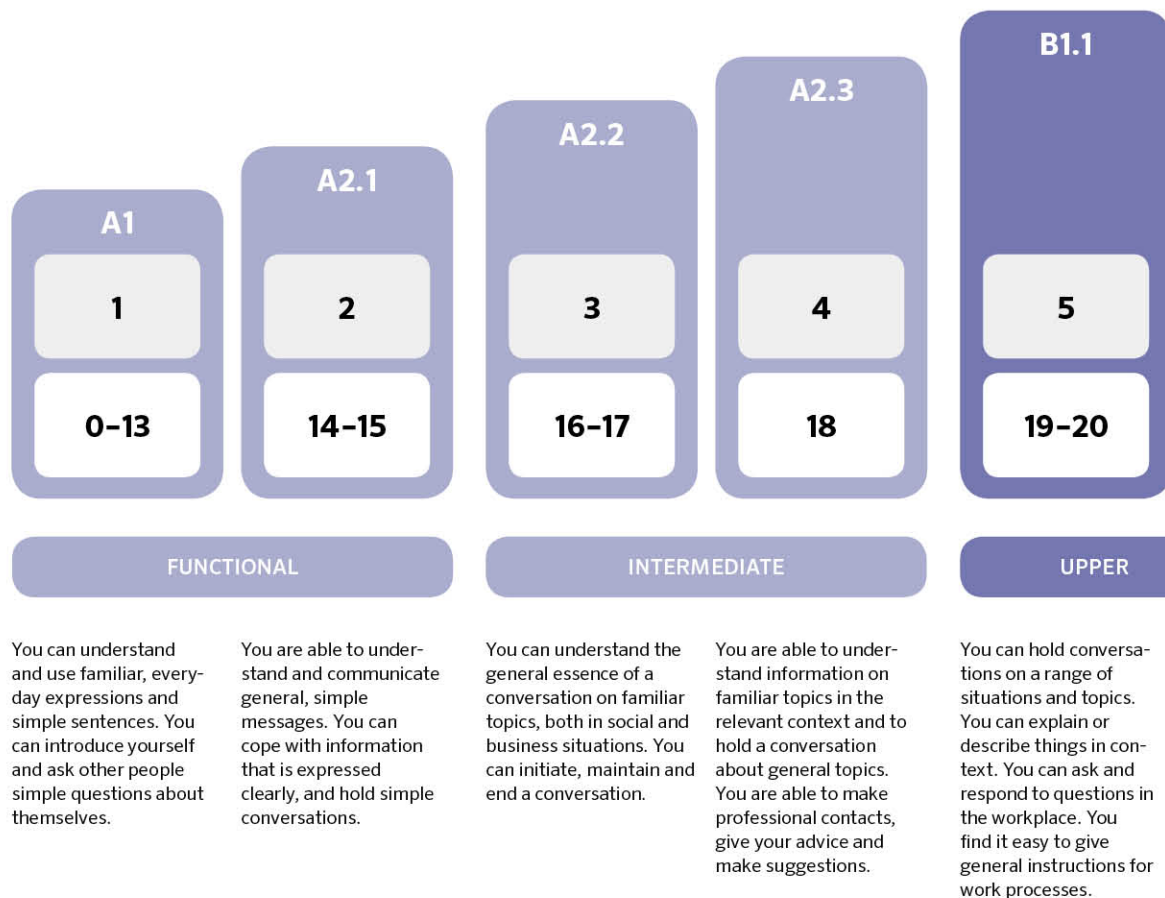

THE BERLITZ LEVELS

The Berlitz Online Placement Test

evaluates your language competence and skills in English, Spanish, French, Italian, or German.

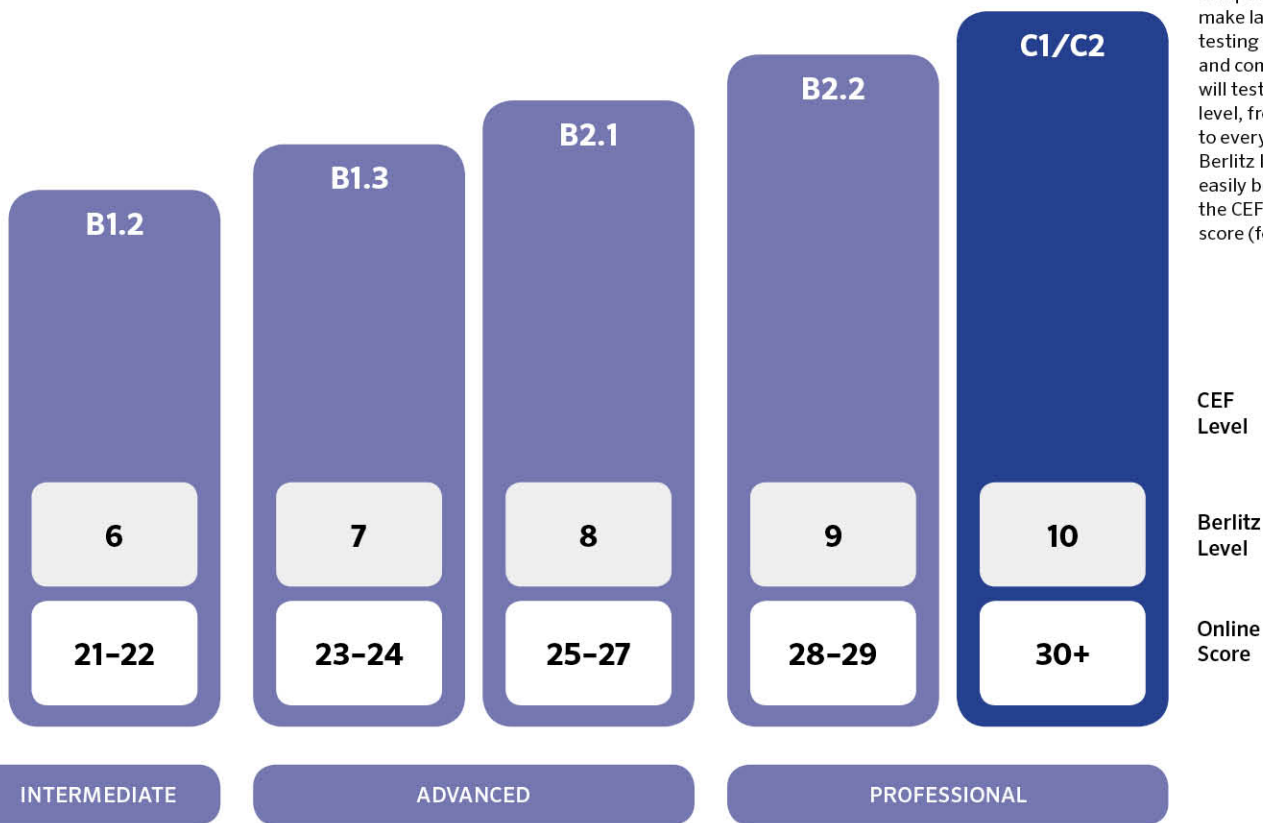

Choosing the right course and suitable Berlitz Level – the Berlitz Placement Test delivers significant results within the shortest time and makes it easy for you to make a decision. Based on an oral test in your local Berlitz language center or a short multiple-choice test on the internet (available in English, French, German, Spanish and Italian) listening and reading comprehension, current vocabulary and grammar skills are assessed. Based on this a recommendation is made for the appropriate program, and a student is placed into the correct Berlitz Level.

The Berlitz Levels allow for a precise evaluation of anyone’s oral and written language skills. The classification of Berlitz Levels is based on the standardized “Common European Framework of Reference for Languages”, but due to its more detailed breakdown allows for a more exact evaluation. Thus the range of language courses offered can be tailored better to each participant – to ensure that they achieve their individual learning goals.

The “Common European Framework of Reference for Language Learning, Teaching and Assessment” (CEF)

divides all languages into six levels of language competence in order to make language learning and testing more transparent and comparable. Berlitz will test your language level, free of charge, prior to every course. The ten Berlitz levels can then very easily be aligned with both the CEF levels and online score (for E-Learning).

BERLITZ PROFICIENCY TESTING

Fast and accurate assessment of language fluency.

Which Test for Which Occasion?

Test for high-level decisions:

Assessment of language skills in recruiting or as an independent test as part of the performance review of company employees.

- BOPT
- BPI

Test for mid-level decisions:

Language assessment with certification as proof of language skills for international seminars or for job applications.

- BOPT

The decision on which test to use should depend on the purpose of the test in a given situation.

In order to effectively test language competence and skills Berlitz offers different options: the **Berlitz Online Proficiency Test (BOPT)** and the **Berlitz Proficiency Interview (BPI)**. These tests are used to evaluate participants' language skills – making it possible to effectively improve areas of weakness and to measure progress made, quickly and meaningfully.

The Berlitz Online Proficiency Test is simple to take and available in five languages. The test results are based on the Common European Framework of Reference for Languages (CEF) and are sent via email immediately upon test completion. Thus you have a way to test current language skills quickly, clearly and cost effectively – and as the test is based on worldwide standards it provides the ideal basis for comparison. And so the Berlitz Online Proficiency Test is the ideal tool for assessing employees and for focusing their continued language training.

THE BERLITZ ONLINE PROFICIENCY TEST

- Standardized online language test for English, Spanish, French, Italian, German
- User interface in English, Spanish, French, German, Italian and Dutch
- Tests listening and reading comprehension
- Tests grammar skills and vocabulary
- Test results immediately via email
- Assessment aligned to the Common European Framework of Reference for Languages
- Length: 60-90 minutes

A further option for assessment is the Berlitz Proficiency Interview. This consists of an oral communication test via telephone, during which the tester conducting the interview can get an exact picture of the current language level of the person being tested. The evaluation of this individually customized interview is usually completed within 36 hours. These results are also based on the Common European Framework of Reference for Languages.

THE BERLITZ PROFICIENCY INTERVIEW

- Telephone interview
- Available in practically all languages
- Evaluation of communication skills according to the Common European Framework of Reference for Languages
- Test results via email after 36 hours
- Interview length approximately 20 minutes

“Assess my current language skills myself? I’d rather leave that to the professionals.”
